

Optimisation del ancho de banda

Exercises - QoS

Christian Benvenuti

Managua, Nicaragua, 1-5/3/2010

Here is the plan ...

- Quick review of:
 - Basic QoS theory
 - Linux Traffic Control (TC)
 - --> This is the same presentation used in September'09
- Exercises
 - We are going to define the requirements of real case scenarios (your universities) together and translate them into a TC configuration.
 - Using the monitoring tools we know, we should be able to also verify whether the various configurations work as expected or not.
